

Renewing the Hungarian research libraries' system: a possible way to develop and collaborate

Dóra KALYDY

Library and Information Centre of the Hungarian Academy
of Sciences

Changed research libraries' roles

- management of massive online information
- Utilizing OA possibilities
- Dissemination of OS
- New services built on OA, e.g. Open Journal System
- Repositories - preserving scientific outputs
- Maintaining electronic documents
- Authentications (e.g. EduRoam, EduID, DOI, OrcID)

Trends of research libraries 1

Changed IT circumstances - new cloud based scientific knowledge platform

- Dealing with databases,
- OA repositories, (text, image, data)
- digitalized and born digital documents

Trends of research libraries 2

Supporting scientific output along the principles of Open Science

- Not only dissemination but implantation of OA
 - e.g. Open Journal System, innovative metric
- Open Access Policy - according to Plan S

Trends of research libraries 3

Digitalizing - the best (and easiest) way to collaborate among V4 countries

- Keeping and preserving cultural heritage
- National Strategy for Digitalization of Public Collections - priorities, know how-s

Trends of research libraries 4

Human Resources

- Changed circumstances, new skills needed
- Librarians with wide knowledge of their fields

Keywords of our age

- Collaboration
- Division of tasks
- Sharing
- Life Long Learning

Thank you for your attention!
